Call for Papers

11th Comparative Analysis of Enterprise Data & COST Conference 2012

Topics

The aim of the conference is to promote scientific research using enterprise micro data. The conference is a unique meeting point for producers and users of these data, such as statisticians, economists and econometricians, but also an opportunity for policymakers to get acquainted with the newest research results and policy implications in this rapidly expanding field. Topics of interest include, but are not limited to:

- resource reallocation and adjustment costs
- productivity
- information and communication technology
- R&D
- market competition
- exit and entry dynamics
- transition and development
- labour issues
- environment
- corporate governance
- corporate finance
- trade
- linked employer-employee analysis.
