## Motivation

The IAB and ASB have made a cooperation agreement involving possibilities for exchange of researchers in the form of short or longer term visits at the partner institution, facilitated data access, common research projects, etc. In order to celebrate the agreement and let the employees at the two research institutions get acquainted, a kick-off workshop is organized in the middle of May 2009. A joint workshop will be take place every other year.

## Topics

The workshop presents recent research in areas that are common to both institutions, particularly work in labour economics, education economics, on migration, internationalization and trade. We would like to concentrate on contributions that illuminate the type of data available at the two institutions. Theoretical contributions and empirical research using survey evidence, register data as well as policy-orientated papers are welcome.
