

Call for Papers

Methodologies of long-term forecasting

International
Workshop

Topic

The Institute for Employment Research, Germany, invites submissions for a conference on methodologies of long-term forecasting. The conference aims at stimulating exchange on the methods to model and forecast aggregates such as GDP growth or labour demand for a horizon of 10 to 30 years. Contributions to general forecasting methods are as welcome as disaggregate forecasts by sectors or regions, international comparison, or forecast evaluation. A panel discussion will address future developments in a shrinking economy.

Confirmed Speakers

The keynote speech will be delivered by Hans Fehr.

Panel discussants:

- Hans Fehr (University of Würzburg)
- Meinhard Miegel (Denkwerk Zukunft – Foundation for Cultural Renewal)
- Joachim Möller (IAB)
- Olaf Storbeck (moderator, Handelsblatt)

Submission

Please submit electronic versions of full papers or extended abstracts in PDF until September 15 to forecast2011@iab.de.

Please also indicate whether you require reimbursement of your travel expenses. There are limited funds to cover economy class air and ground travel.

Date:

December 8 - 9, 2011

Location:

Federal
Employment Agency,
Regensburger Straße 104,
Z 164,
90478 Nuremberg,
Germany
